

AMAZING PLANT FACTS FROM AROUND THE WORLD!

One of the largest flowers in the world is the gigantic Rafflesia. It grows up to one metre wide and has no stem or leaves!

Rafflesia

An African Baobab tree has a bulging trunk that can grow up to 15 metres wide. This tree is also very useful. People eat the fruit and the flowers and they make cloth and paper from the leaves and roots!

A Baobab tree

A Liana plant's stem works like a vacuum cleaner in the hot rainforest, sucking water up the plant at a rate of one metre a minute!

A Monkey flower is like an airport runway. The flower's markings show the bees where to land and find the tasty nectar. These markings are only visible to bees!
